- › Perform inventory of assets faster and more accurately even at remote locations
- › Complete reporting for missing, misplaced assets
- › Track asset value including depreciation of assets
- › Track warranty of equipments
- › Runs on Windows Mobile terminals
- › Works with Microsoft SQL database

Barcode Gulf's FASoft asset tracking solution is a powerful, easy to use solution to efficiently track and control your company's fixed assets.

The solution covers the entire spectrum starting from labeling the assets, to auditing the assets, till generating reports.

FASoft gives you the flexibility of entering asset information either on the PC or remotely on the hand held terminals. The hand held terminals makes assets inventory a quick and simple process.

FASoft Server

The FASoft Server application runs on a PC and allows the user to create and maintain master data pertaining to assets, location, department, suppliers, users etc. The application can also print barcode labels in different formats, to be affixed on the assets. The operator can generate different reports based on multiple selection criteria. Multiple access levels based on user privileges provide enhanced security and control.

Smart FASoft - Main Menu

The screenshot displays a main menu for the FASoft application. It features a vertical list of seven green buttons with white text: "Verify Asset", "Asset Audit", "New Asset", "Modify Asset", "Transfer Assets", "Settings And Sync", and "Log off". To the left of these buttons are small icons representing a barcode, a folder, a plus sign, a notepad, a circular arrow, puzzle pieces, and a key. At the bottom of the screen, the text "User: fasoft" is visible.

User: fasoft

Asset Audit

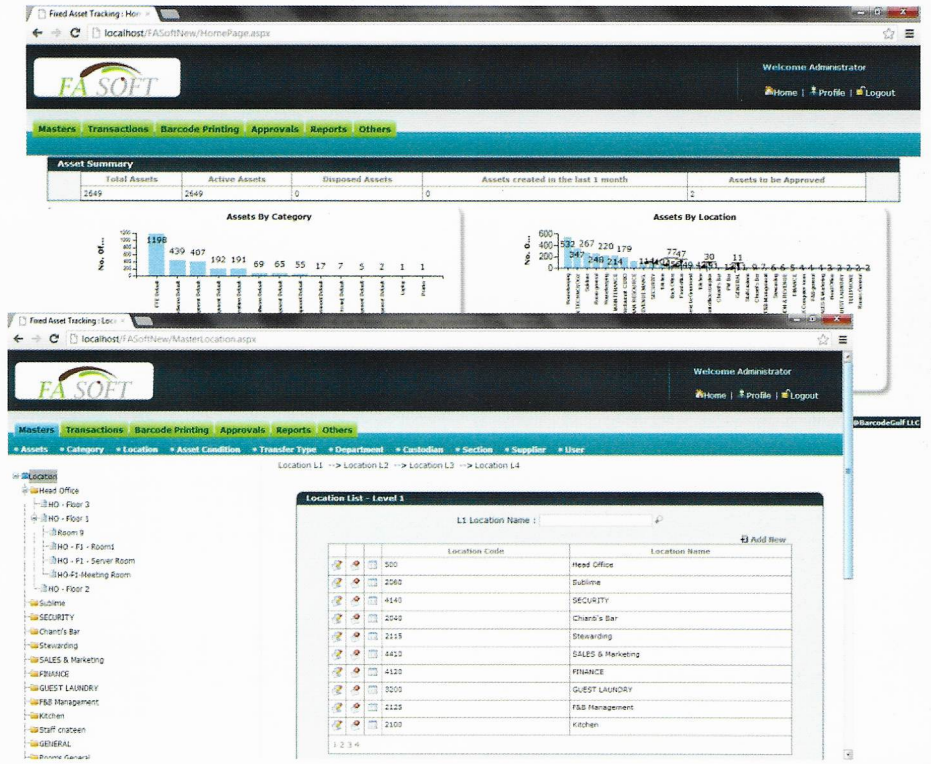

The screenshot shows the "Asset Audit" form. It includes several input fields: "Location", "Department", "AssetScan", "Barcode" (with value CH-02030), "S No" (with value CZC1139FPJ), "Code", "Ref Code", and "Desc" (with value Desktop CPU). Below these fields is a section titled "Asset Recorded" containing a table:

	Current	Total
Scan Count	1	1

At the bottom of the form are three buttons: "Back", "Clear", and "Save".

Key Features of FASoft

- New Asset Master creation
- Assign to Location
- Assign to Department
- Assign to Section
- Assign to Owner / Employee
- Track Asset Status
- Asset Transfers
- Asset Audits
- Integrated Barcode Scanning and Label Printing
- Enhanced Security Features
- Runs on Windows Mobile terminals

FASoft Client

FASoft Client runs on the hand held terminals. The application provides an easy front end to the user, to collect details regarding the assets. The client application provides option for the user to capture information pertaining to new assets. Whenever new assets are created, the location, department, section, owner etc of this asset is captured on the HHT. The application also provides options to perform asset audits, asset transfers etc.
